Katalog

CH værktøjs- og maskinproduktion tilbyder aluminiumsprofiler og komponenter for fremstilling af stativer.

Dette katalog indeholder de mest almindelige standard komponenter, men vi leverer et stort tilbehørsprogram samt specialfremstillede komponenter.

Aluminiumsprofilerne leveres opskåret på mål eller i hele længder. Ligeledes tilbydes bearbejdning af profiler for central spænder.

Tandremsdrevne lineære føringer leveres som komplette enheder i vilkårlig længde.

Sidst i kataloget er der inspiration til samling af stativer.
